OVERVIEW

The Benson Ford Research Center, home to the Archives of The Henry Ford, holds more than 3000 individual collections, or accessions. Many of these accessions remain partially or completely unprocessed and do not have detailed finding aids. In order to provide a measure of insight into these materials, the Archives has assembled this listing of more than 1100 new and unprocessed accessions.

Accessions are listed alphabetically by title in two groups: **New Accessions** contains materials acquired 2018-2020, and **Accessions 1929-2017** contains materials acquired since the opening of The Henry Ford in 1929 through 2017.

The list will be updated periodically to include new acquisitions and remove those that have been more fully described. Researchers interested in access to any of the collections listed here should contact Benson Ford Research Center staff (email: research.center@thehenryford.org) to discuss collection availability.

ACCESSION NUMBERS

Each accession is assigned a unique identification number, or accession number. These are generally multi-part codes, with the left-most digits indicating the year in which the accession was acquired by the Archives. There, are however, some exceptions. Numbering practices covering the majority of accessions are outlined below.

- Acquisitions made during or after the year 2000 have 4-digit year values, such as 2020, 2019, etc.
- Acquisitions made prior to the year 2000 have 2-digit year values, such as 99 for 1999, 57 for 1957, and so forth.
- Accessions where the acquisition date cannot be determined have 2-digit year values of 00.
- Accession numbers beginning with AR indicate that the accession has been acquired from the Ford Motor Company Corporate Archive, but not yet assigned a local accession number by the Archives.
- Beginning in 1964 with the donation to The Henry Ford from the Ford Motor Company of Ford's historic business records, many accessions were assigned a simpler one-part identification number in an ongoing series beginning at 1. That practice extended into the mid- to late 1990s and stopped completely at the end of 1999.
